YOUR FLEET MAINTENANCE MANAGER

KNOW WHAT YOU'RE SPENDING ON YOUR FLEET'S MAINTENANCE, AND WHY.

ONE JOB CARD, EVERY STEP ON RECORD. ORANGE STEPS CARRY THE PERSON'S NAME AND THE TIME.

REQUESTED → APPROVED → QUOTE APPROVED → WORK DONE → INVOICE CHECKED → CLOSED

1 EVERY APPROVAL ON RECORD

PROBLEM Repairs get approved by chat or phone call, and nobody can say later who said yes.

FIX Approvals carry the person's name and the time. Only the administrator may decide on their own request, and it is recorded.

2 ONE CARD, EVEN OFFLINE

PROBLEM History is scattered across spreadsheets and chats, and written up late.

FIX One job card per repair, every step logged. Fill the Excel form offline and upload it later.

3 WORKSHOPS QUOTE FROM A PHONE

PROBLEM Quotes arrive as phone calls and photos, then get lost or disputed.

FIX The workshop gets a one-time link on its own phone and sends its estimate, recorded against the job card number.

4 INVOICES CHECKED FIRST

PROBLEM A workshop's invoice comes in higher than the price you agreed.

FIX Every invoice is checked against the approved quotation, and not by whoever approved the card.

5 COST LANDS ON THE RIGHT VEHICLE

PROBLEM Nobody knows what each vehicle really costs, or who had it at the time.

FIX Spend is counted per vehicle and period against its budget, and follows who held it.

6 REPEAT REPAIRS ARE FLAGGED

PROBLEM The same fault is paid for again and again.

FIX A fault coming back on the same vehicle is shown, so you see what keeps failing.

7 DRIVERS SEE THEIR OWN VEHICLE

PROBLEM Drivers ask the office what their vehicle cost, and open access shows the whole fleet.

FIX A driver sees only the job cards of the vehicle they hold, and what it cost.

8 EVERY ACTION HAS A NAME

PROBLEM Shared logins mean no action can be traced to anyone.

FIX Every login is tied to an employee code and a role, so each action traces to a person.

COMING SOON

BUILT TO COUNTER CORRUPTION: INVITATIONS THAT ONLY REACH THE PERSON THEY ARE MEANT FOR.

Each person will receive their sign-in link by WhatsApp or SMS on their own number, sent by the system itself, so no administrator ever handles it. No borrowed logins.
