FleetOTG
VEHICLE MANAGEMENT & MOBILITY

VEHICLE MAINTENANCE, WITH NOWHERE TO HIDE

Every repair. Every rupee. Every approval on record.

Fleet OTG replaces spreadsheets, phone calls and chat approvals with one job card for every repair, so you can see what was done, what it cost and who said yes.

1 No one approves their own request

Whoever raises a job card cannot approve it. The approval is stored with the person's name and the time.

2 One card per repair, full history

Status, parts, labour and cost on one card. Every step is logged: who did what, and when.

3 Repeat repairs are flagged

The same fault coming back on the same vehicle is shown, so you can see what keeps failing and why.

4 Cost lands on the right vehicle

Spend is counted per vehicle and per period against its budget, and follows who held the vehicle at the time.

5 Fill it in offline

Download the standard job card form as Excel, fill it in at the workshop with no internet, and upload it later.

6 Every person has an employee code

Each login is tied to an employee code and a role in your organisation, so each action traces back to a real person.

COMING SOON

Built to counter corruption: invitations that only reach the person they are meant for.

Each person will receive their sign-in link by WhatsApp or SMS on their own phone number, sent by the system itself, so no administrator ever sees or handles the link. No borrowed logins, no one taking over someone else's account.

Priced to be easy to say yes to

One month costs about the same as a month's wage for an unskilled labourer. Start with a 3-day free trial.
