WHAT IT COSTS TO RUN

ONE COMPANY WITH 200 VEHICLES: THE MONTHLY OPERATING COST

Fleet OTG is multi-tenant: every company has its own workspace on one shared platform. So most cost is a small fixed platform bill that every extra company shares, and only a thin slice grows with each company. These are planning estimates from stated assumptions, in US dollars a month.

THE COMPANY WE PRICED ASSUMPTIONS

200 vehicles
cars, vans, trucks, loaders

~50 people
managers, officers, drivers

~200 job cards
a month

~400 documents
workshop estimates and invoices read by the AI

~200 messages
monthly odometer request on WhatsApp

Pro plan
AI on; all job cards by WhatsApp (worst case)

GROWS WITH THE COMPANY PER MONTH

ITEM	USD
WhatsApp messages ~600 to 1,000 template messages at $0.015 each, plus job card replies: free for the first 1,000 a month on the shared business number, then $0.015.	9 – 35
AI reading Claude Haiku 5.5, about 400 documents and 200 job card drafts.	< 2
Email Reminder digests, invitations, payment mails.	0 – 2
Files and data About 400 MB of photos and PDFs a month; the records themselves are tiny.	< 1
Subtotal	≈ 10 – 40

SHARED BY EVERY COMPANY PER MONTH

ITEM	USD
Database, login, storage Supabase Pro, plus a larger compute tier as load grows.	25 – 60
Hosting and scheduled jobs Netlify.	19 – 40
Domain, live chat, mail service Small fixed items.	5 – 20
Subtotal	≈ 60 – 100

COST PER COMPANY, BY HOW MANY COMPANIES SHARE THE PLATFORM

1 COMPANY
$70 – 126
The whole platform bill lands on one customer.

10 COMPANIES
$16 – 50
Platform share is $6 to $10 each.

25 COMPANIES
$12 – 44
Platform share falls to $2 to $4 each.

WHERE THE MONEY GOES 10 COMPANIES, MIDDLE OF EACH RANGE, ABOUT $33

WhatsApp messages · Shared platform · AI, email, storage

WHAT MOVES THE NUMBER

- **WhatsApp is the lever.** Meta's Pakistan rates are $0.015 for utility messages and for replies after the first 1,000 a month; marketing is $0.0473. Fewer status messages, or leaving the monthly odometer request off, cuts the largest line.
- **The platform steps up, it does not scale per company.** Expect a larger database tier somewhere past 25 to 50 busy companies.
- **Each extra 200 vehicles** in one company adds about $10 to $18 a month on Basic and $10 to $40 on Pro; the shared platform bill does not grow. Pro is one price for every fleet size, so the margin narrows on very large fleets. AI stays small.
- **Not counted:** staff time, support, taxes, and any paid plan for live chat.

Planning estimates, not quotes. Built from the usage assumptions above and the price lists as understood at the time of writing (2026-11-08), including Meta's Pakistan rates from October 2026, which have not been checked against invoices. To be replaced by measured costs once several companies are live. No revenue or subscription price is shown on this page.

WHAT THE APPLICATION OFFERS

EVERY REPAIR ON RECORD. EVERY COST ON THE RIGHT VEHICLE.

1 JOB CARDS WITH RECORDED APPROVALS
Every step carries the person's name and the time. Whoever raises a request cannot approve it.

2 WORKSHOPS NEVER SIGN UP
Estimates and invoices arrive by a one-time phone link or an email reply, filed on the job card.

3 INVOICES CHECKED FIRST
Each invoice is checked against the approved quotation, and not by whoever approved the job.

4 SERVICING AND PAPERS
Rules by months, kilometres or engine hours; insurance, fitness, token tax and licence reminders.

5 ODOMETER WITHOUT AN APP
Drivers send readings and engine hours from a phone link, with no account and no password.

6 COSTS AND BUDGETS
Spend per vehicle, kilometre and department against budgets, following who held the vehicle.

7 DEPARTMENTS AND VEHICLE REQUESTS
Departments run their own vehicles under a spending limit; HR requests a vehicle and a manager decides.

8 TRIPS (OPTIONAL MODULE)
Request, approve and record a trip, with the odometer out and back.

P AI READS WORKSHOP PAPERWORK PRO
The AI fills in the form from an emailed estimate or invoice; a person always checks and saves.

P JOB CARDS BY WHATSAPP PRO
An employee sends one message, the AI drafts it, they confirm, a manager approves in the app.

WHERE IT IS USED USE CASES

DELIVERY AND LOGISTICS FLEETS
Vans and trucks on the road all day. Job cards with approvals, repeat-repair flags, odometer by phone link.
Fewer repairs paid twice.

MANUFACTURERS AND EXPORTERS
Pool cars and staff transport. HR vehicle requests, optional trip requests, cost by department.
One record of who had which vehicle.

WAREHOUSES, YARDS AND CONSTRUCTION
Loaders and forklifts serviced by engine hours as well as kilometres and months.
Service on hours, not guesswork.

DISTRIBUTION AND FIELD SALES
Many drivers, few office staff. Readings and papers tracked, reminders before anything expires.
Papers and licences never lapse unseen.

COMPANIES WITH MANY WORKSHOPS
Workshops send estimates from their own phones. Quotations compared with invoices before payment.
No workshop has to learn a system.

MULTI-DEPARTMENT ORGANISATIONS
Each department looks after its own vehicles within a limit, while finance sees the whole fleet.
Approvals match who is accountable.

BASIC
Every feature above except the two marked Pro. One price for the whole company, no per-user charges, free trial with no card.

PRO
Basic plus the AI document reading and job cards by WhatsApp, for companies that raise many job cards a day. One price for every fleet size.

BUILT TO RUN MANY COMPANIES ON ONE PLATFORM WHY THE COST PER COMPANY FALLS

KEPT APART
Each company's data lives in its own schema, or its own database on request. Companies never see each other.

EVERY CHANGE TRACED
Each change to business data is written to an audit log with the person and the time.

SELF-SERVE
A company signs up, gets a free trial and is set up without our staff. Payments are confirmed and invoiced in the app.

TESTED
More than 1,000 automated checks and a 230-check browser suite pass before each release.

Capabilities shown are in the product today. The AI and WhatsApp job cards are built and live but not yet proven with a paying company. Cost figures on page 1 are planning estimates, not quotes.
